

PureWaterConditioner™

NEW

ClearTAC™

Residential Water Conditioning System

- *Point-of-Entry systems with scale reducing media and Premium coconut shell carbon*
- *Effective alternative to Ion exchange softeners*

- Proven 90% effective for preventing scale
- No chemicals or salts needed
- No brine discharge. Can be used in areas where conventional ion-exchange water-softeners are banned
- Long lasting media-not consumed by the reactions
- Treats water up to 75 grains (1300 ppm CaCO₃)
- Virtually Maintenance free

The new VERTEX ClearTAC™ system uses Template Assisted Crystallization technology to reduce hard-water deposits from forming on pipes and fixtures. The premium coconut carbon reduces or eliminates chlorine taste and odor while the beneficial minerals remain. This advanced water treatment device can be used in areas where conventional water softeners are banned. There are no chemicals or salts needed and there is no brine discharge.

How Does It Work?

ClearTAC prevents scale build-up by transforming the hardness minerals into undissolved crystal micro-particles. These crystals are suspended in the water and stay in solution so they don't deposit on faucets and pipes. The ClearTAC passes DGW-512 standard for physical water treatment (PWT) devices, and two independent lab tests confirm our own results at the Vertex lab of 90% or more effectiveness in reduction of scale build-up.

Available with or without SS jacket

Choose from the 3 most common flow rates: 10, 12 & 16 GPM

ClearTAC™

Water Conditioning Systems for Commercial Applications

- *Point-of-Entry and Point-of-Use Scale reduction tank and cartridge systems*
- *Great for specific food service or restaurant applications*
- *Effective alternative to Ion exchange softeners*

- Proven 90% effective for preventing scale
- No chemicals or salts needed
- No brine discharge. Can be used in areas where conventional ion-exchange water-softeners are banned
- Long lasting media-not consumed by the reactions
- Treats water up to 75 grains (1300 ppm CaCO₃)
- Economical and efficient – Uses No Energy
- Virtually Maintenance free
- Protects appliances for longer lifespan
- Scale protection for Tank-less Water Heaters, Steamers, Misters, Humidifiers, Coffee Brewers and more
- Meets DGW-512 standard for Physical Water Treatment (PWT)

The new VERTEX ClearTAC™ system uses Template Assisted Crystallization technology to reduce hard-water deposits from forming on pipes and fixtures. The premium coconut carbon reduces or eliminates chlorine taste and odor while the beneficial minerals remain. This advanced water treatment device can be used in areas where conventional water softeners are banned. There are no chemicals or salts needed and there is no brine discharge.
